Abteilung DPS - Digital Public Services
Der Geschäftsbereich Digital Public Services (DPS) bündelt die Aktivitäten rund um eGovernment und Öffentliche IT. Er unterstützt Politik, Verwaltung und Wirtschaft bei der strategischen Umsetzung von interoperablen und sicheren IKT-Lösungen im öffentlichen Raum und in der öffentlichen Verwaltung.

NOWADAYS GmbH
Project Assistant
December 2017 - December 2018 (1 year 1 month)
NOWADAYS ist eine Agentur für übergreifende Kommunikation und Produktion. Die Departments kreieren im Dialog mit dem Kunden Konzepte für Fotografie, Event, Film, Print & Kunst. NOWADAYS ist gemeinsam mit dem Partner Mercedes-Benz Veranstalter der MBFW (Fashion Week Berlin).

FinCompare GmbH
Business Development - Corporate Finance Advisor
September 2017 - November 2017 (3 months)
Berlin und Umgebung, Deutschland
FinCompare ist eine Finanzierungsplattform für KMU. Mit dem unabhängigen Beratungsansatz sowie mit Hilfe von Technologie bietet sie eine komfortable Anlaufstelle für alle Fragen rund um Unternehmensfinanzierung. Neben traditionellen Finanzierungsarten wie dem Firmenkredit, finden sich auch alternative Formen der Unternehmensfinanzierung wie zum Beispiel Firmenleasing, Factoring, Finetrading und Lagerfinanzierung.

hub:raum

Junior Investment Analyst

March 2017 - July 2017 (5 months)

Berlin und Umgebung, Deutschland

hub:raum is the incubator of Deutsche Telekom, supporting early stage startups. Besides investing in and mentoring startups with innovative business ideas, hub:raum also runs several x-industry and prototyping programs (such as Golgnite and Warp Future Communications). What makes hub:raum unique is that we generate commercial opportunities between the startup ecosystem and business units of Deutsche Telekom. We have been doing this since 2012 in our three locations: Berlin, Krakow and Tel-Aviv.

My tasks are:

Supporting the VC deal flow, screening applications, evaluating business plans and ideas, participate in pitches, perform due diligence, contract closing. Representing hub:raum at events, panels and startup competitions.

comMoney (FinTech)

Founder

September 2016 - March 2017 (7 months)

Stuttgart und Umgebung, Deutschland

Business & Product Development

Right after graduating, my co-founders & I were working on a app for P2P-payments, since existing solutions didn't succeed well on the German market yet. We saw our chance in focussing our marketing activities initially on the ecosystem around campuses of universities, because from our own experience there is (still) high demand for such solutions.

After realizing that experience, funding and network in that business is crucial for a quick success, we decided to evolve separately in other companies in the startup ecosystems.

Each of us is still planning to start a venture in the future again. But this time stronger than before ;-)

FR79 GbR (event management company)

Co-Founder

March 2013 - December 2015 (2 years 10 months)

Freiburg und Umgebung, Deutschland

We are a collective consisting of two medicine students, one cultural management student and me. We organize commercial public parties at

extraordinary locations, e.g. in an old brewery or abandoned subway. By keeping the entrance prices fair, we want to get electronic music bigger in Freiburg. Managing parties with up to 500 guests, is a great learning experience in the area of event planning and implementation.

Bildung für Flüchtlinge in Freiburg
Co-Founder (social entrepreneurship)
May 2015 - August 2015 (4 months)
Freiburg und Umgebung, Deutschland

My Co-Founders and me started this initiative in order to bring access to higher education for refugees that were willing to learn. We installed the E-Learning database of the Californian NGO "Foundation For Learning Equality" with their permission on a little Raspberry Pie server, that we brought to the asylum home, where we had no internet. With a WiFi-device we were able to give access to the E-Learning database on the server. So the Refugees could work on crowdfunded tablets connected wirelessly to the E-Learning program, while we supported them. We were surprised about the success and the good feedback, resulting in a growing group. My tasks were planning projects, funding and education care.
